	What did you feel? Where in your body? How long for?		What did that mean about your health? What's the worst thing about that – the worst thing that could happen? How much of your focus of attention was taken up with thinking about your body and your symptoms?	Write everything you did or didn't do & how long for. What and how did you check the symptom? How did you seek reassurance about it? Did you avoid doing anything?	Is this fact or opinion? What would someone else make of this? What advice would I give a friend? Is my reaction in proportion? Is the problem that I'm seriously ill - or is it my belief that I'm seriously ill that is causing physical symptoms of anxiety?	What are the consequences of acting this way? What will help most? What would be the best thing to do for me, and for this situation?
